

The 7 Most Stylish Kitchen Compost Bins for Your Small Space

Everyone has a different style and taste when it comes to décor. Thankfully, there are plenty of kitchen compost bins to choose from to fit your style, taste, budget and space needs. We found the seven best options for your food scraps.

Composting Bin Solutions

If you like to cook, you might find yourself generating a lot of food scraps such as the ends of fruits and veggies or coffee grinds. All of these types of items can be composted. Composting breaks down the biological components of these materials to create organic fertilizer. Composting is an amazing way to benefit the soil and decrease greenhouse emissions from landfills.

However, collecting your compost materials can be far from pretty. Most people give up on the idea of composting because they don't like to put their dirty containers on the counter or use precious cabinet space to store items, leaving less room in your small space. It makes sense that we wouldn't put regular dirty trash containers on our countertops, so we wouldn't want to put ugly compost bins on our countertops either.

Collecting compost scraps is easier and fun when you have a compost bin that you like. We found a variety of stylish compost bins that work well, keep pests and odors out, and compliment small spaces. Check out our guide to find the seven most stylish kitchen compost bins for your small space.

1. Bamboo Compost Bin by Bamboozle

Features | Made of Bamboo, Easy to Clean, Biodegradable

Price | \$40

This gorgeous compost container is made of durable bamboo fibers that are eco-friendly. We love that the bin is completely biodegradable so you know that when you're not longer able to use the product, it won't clog up a landfill. The Bamboo Compost Bin is perfect for your countertop, with the ability to hold up to 18.5 cups. The bin is offered in multiple colors including terracotta, natural and graphite. The Bamboo Compost is light, easy to transport and will easily blend into your kitchen. The odor blocking, carbon filter keeps unpleasant smells away. Plus, the entire bin is dishwasher safe which allows for an easy clean up.

3. OXO Compost Bin by The Container Store

Features | Minimalistic Design, Compact Design

Price | \$19.99

The OXO Compost Bin is an attractive, minimalistic designed compost bin. The OXO Compost bin is opaque in color, easily hiding food scrapes from the public eye. This design will fit perfectly with multiple styles of house décor, whether you choose to store your bin in a cabinet or on shelf. The bin is designed with a lid that has a wide opening which makes it easy to toss your foods into the compost without creating a mess. We love the gripper pads located at the bottom of the bin to keep it in place. The OXO compost bin has a 3-quart capacity, is dishwasher safe and created out of polypropylene and double-walled ABS plastic.

4. Intelligent Compost Food Waste Bin by Joseph Joseph

Features | Different size options, Rectangular Shape, Innovative Ventilated Design

Price | \$39.60 for the larger version, \$19.99 for the compact version

The Intelligent Compost Food Waste Bin by Joseph Joseph is a stylish, smart design, that offers two different bin options for your convenience. We love that there is a larger style bin for the countertop that can hold up to 1 gallon, and a smaller, mountable, door option that holds up to four liters. This bin is available in multiple colors including stone, sky, and graphite. This really allows you to find a color that fits with your homes aesthetic. We adore this polypropylene bin design because of its unique square shape and stainless steel handle, as well as it's innovative ventilated design and liner retaining holes which help to keep your bag from moving around.
